

Exo 9 à 11 p199

Mohamed.Ayadi 1SD

March 2017

1 Exo 9 p199

- a) $(\overrightarrow{OA}, \overrightarrow{OC}) = 120^\circ$
- b) $(\overrightarrow{AB}, \overrightarrow{BE}) = 60^\circ$
- c) $(\overrightarrow{AB}, \overrightarrow{CD}) = 60^\circ$
- d) $(\overrightarrow{AB}, \overrightarrow{OE}) = 60^\circ$

2 Exo 10 p199

- a) $(\overrightarrow{CA}, \overrightarrow{CB}) = \frac{\pi}{6}$
- b) $(\overrightarrow{CA}, \overrightarrow{BC}) = -\frac{\pi}{6}$
- c) $(\overrightarrow{OA}, \overrightarrow{OC}) = -\frac{\pi}{2}$

3 Exo 11 p199

- a) $(\overrightarrow{AC}, \overrightarrow{AE}) = \frac{(\overrightarrow{AC}, \overrightarrow{AB})}{2} + \frac{\pi - (\overrightarrow{HA}, \overrightarrow{HE})}{2}$
 $= -\frac{\pi}{6} - \frac{\pi}{4} = -\frac{5\pi}{12}$
- b) $(\overrightarrow{BA}, \overrightarrow{CB}) = (\overrightarrow{BA}, \overrightarrow{BC})$
 $= -(\overrightarrow{BC}, \overrightarrow{BA}) = \frac{\pi}{2}$
- c) $(\overrightarrow{AH}, \overrightarrow{EB}) = (\overrightarrow{HA}, \overrightarrow{EH}) = \frac{\pi}{2}$
- d) $(\overrightarrow{EA}, \overrightarrow{CH}) = (\overrightarrow{EA}, \overrightarrow{EC}) = \frac{\pi - (\overrightarrow{HA}, \overrightarrow{HE})}{2} = \frac{\frac{\pi}{2}}{2} = \frac{\pi}{4}$
